RECOMMENDATION: CLIMATE EMERGENCY

2020-020

It was MOVED and SECONDED
THAT Council:

Joins other jurisdictions of Metro Vancouver in recognizing the “climate emergency” arising from critical threats that climate change poses on multiple fronts to regional ecosystems, city infrastructure and the well-being of White Rock’s citizens,

Declares its determination to ensure that the critical interests of White Rock and its citizens are protected and advanced in the fullest possible measure through the City’s climate change mitigation and adaptation strategies,

Requests the Environmental Advisory Committee, working with staff:

(a) In the context of its mandated review of the Environmental Strategic Plan, to give priority consideration to that Plan’s climate change-related elements, and in so doing to consider also the 2010 Community Climate Action Plan and climate change-related elements of the 2017 OCP.

(b) To recommend updated emission reduction targets, aligned with targets established by Metro Vancouver in July 2019, and consistent with current provincial and federal goals and the latest IPCC work.

(c) To recommend steps, including appropriate public consultation measures, to ensure that the City’s climate change goals, policies and actions are updated and consolidated into the Official Community Plan as part of the ongoing OCP review exercise.

Directs staff to:

(a) Ensure that climate change mitigation and adaptation considerations are mainstreamed into decision-making and operations across all City departments and that climate change impact assessments expressly figure in all reports and recommendations to Council,

(b) Keep Council apprised of work by Metro officials and committees to develop regional Climate 2050 Roadmaps, and of opportunities and requirements to ensure the City’s interests and perspectives are taken into account in the Roadmaps process,

(c) Advise Council of any organizational, human resource or financial requirements deemed necessary to ensure the effective implementation of this resolution, as well as opportunities to take advantage of regional, provincial and extra-governmental resources available to inform and support our climate change efforts,
Keep Council regularly informed of progress in the implementation of this resolution, including through briefings on the City’s annual reports to the Province’s Climate Action Revenue Incentive Program (CARIP).

SUBJECT: City Hall Seismic Report – Follow Up Costing Study

RECOMMENDATIONS
THAT Council:
1. Receive for information the corporate report dated January 27, 2020 from the Director of Engineering & Municipal Operations titled “City Hall Seismic Report – Follow Up Costing Study”; and
2. Endorse the expenditure of $30,000 for further study and costing of items related to a seismic retrofit of City Hall.

INTRODUCTION
At the January 13, 2020 Council meeting, Council considered the corporate report “City Hall – Seismic Report 2020” and requested a cost estimate for a follow up study to investigate and provide cost details related to seismic strengthening of City Hall. Items discussed in relation to the seismic study included improving the air quality at the City Hall Annex, accessible parking, accessible washrooms and the feasibility of installing an elevator at City Hall.

ANALYSIS
The January 13, 2020 Corporate Report “City Hall – Seismic Report 2020” outlined a number of options to address the seismic deficiencies at City Hall. Council requested further information and costing related to Option 1 – Seismic Retrofit.

As outlined in the corporate report, the Seismic Retrofit is estimated to cost $1.8 M, will take 9 months to complete and will address life safety issues arising from a major earthquake. The cost estimate excludes staff relocation and office space rental during construction.

Further study and costing of items related to the Seismic Retrofit are estimated to cost $30,000. This study would include:

- Investigation and costing of mitigation options to improve air quality at the City Hall Annex;
- Feasibility review for construction of an elevator at City Hall;
- Investigation and costing of accessibility improvements, including washrooms, at City Hall;
- Investigation of Building Code triggers and possible construction phasing opportunities.
Staff are developing options for improved accessible parking at City Hall and will construct these following Financial Plan approval.

**BUDGET IMPLICATIONS**

The estimated cost of the study is $30,000. As identified in the January 13, 2019 corporate report, there is $50,000 in the Financial Plan (2019 budget) that could be used for detailed feasibility options such as this proposed study. Currently, $35,000 of this budget is uncommitted and available to be carried over to the 2020 budget for this purpose.

**RISK MANAGEMENT**

If City Hall is not seismically retrofitted, the building is expected to fail in a 100-year return earthquake.

**CLIMATE CHANGE IMPLICATIONS**

There are no direct environmental or climate action effects related to this study.

**CONCLUSION**

It is recommended that Council approve the expenditure of $30,000 for further study and costing of items related to a seismic retrofit of City Hall.

Respectfully submitted,

Jim Gordon,
Director, Engineering & Municipal Operations

**Comments from the Chief Administrative Officer:**

I concur with the recommendations of this corporate report.

SUBJECT: WildPlay Element Parks

________________________________________________________

RECOMMENDATIONS

THAT Council:

1. Receive for information the January 27, 2020 corporate report from the Director of Engineering and Municipal Operations titled “WildPlay Element Parks”;

2. Direct staff to arrange a public consultation meeting to obtain feedback from the community and report back to Council with this feedback.

________________________________________________________

INTRODUCTION

This corporate report introduces the company “WildPlay Element Parks” and their history. WildPlay develops and operates adventure recreation facilities in forested areas and ravines. These facilities are intended to bring wilderness playgrounds to urban areas in order to engage children, youth and adults in outdoor physical activities that promote play and exploration beyond a person’s comfort zone.

WildPlay operates parks in Nanaimo, Victoria and Maple Ridge. Initial discussions with staff in Victoria and Maple Ridge indicate that the parks are popular and that the partnerships with the two cities are successful. WildPlay typically follows a business model with a detailed ten to fifteen year lease with a City that covers all aspects of operation including lease rates, insurance, hours of operation, sustainability practices etc.

PAST PRACTICE / POLICY / LEGISLATION

If Council decides to move forward with a proposal of this nature, the City Purchasing Policy will be followed in evaluating this proposal.

ANALYSIS

WildPlay’s development proposal for White Rock is attached as Appendix A and consists of three types of attractions as detailed on pages 9 and 10:

- The first attraction is an aerial adventure course where participants would be safely exposed to balance and navigation challenges above the forest floor at varying levels of difficulty.
- The second attraction is a free fall jump platform.
The third attraction is a zipline around the perimeter of the proposed development area. These attractions would be located in the top 1/3 of the forested area of Ruth Johnson Park and elevated, thereby permitting continued public access along the forest floor. The existing public uses of the area would continue.

**Potential Benefits**

Potential benefits to the City include:

- Funding and in kind works to restore walkways, stairs and other ageing infrastructure in Ruth Johnson Park. The areas beyond the WildPlay footprint of approximately 1/3 of the forested area of Ruth Johnson Park would likely be restored in the years following start up depending on lease contributions and City budgets.
- Removal of invasive species.
- Attractive “season pass” rates for residents that should encourage the physical activity espoused by Fraser Health and the Peace Arch Hospital Foundation as preventative medicine.
- Integration with Generations Playground as WildPlay has levels for all ages and abilities.
- Increasing the City’s tourist profile through WildPlay advertisements on the BC Ferries and other tourist locations.
- The attraction of visitors to White Rock who could very likely visit the beach and White Rock restaurants after a time at WildPlay.

**Plan and Description of Proposed Attractions**

WildPlay advise that their approach to the design and construction of a Zipline and Aerial Adventure Course at Centennial and Ruth Johnson Parks would consider:

- Working with the municipality and stakeholders to identify the most suitable location, and product mix, for WildPlay White Rock considering any environmental concerns, market demand, infrastructure requirements, and revenue expectations.
- Making use of existing natural features of the location to enhance the guest experience and showcase White Rock’s nature and recreational offerings.
- The need to adjust landforms to accommodate weather influences on the site and apparatus, and adapt to tree/forest health changes over time.
- An adventure course and Zipline with multi-level challenges and obstacles accessible to family-oriented visitors of all abilities.
- Utilization of product and design that are world-class, proven and will stand the test of time as it develops into a significant draw to the area.
- WildPlay’s success in creating programming that offers progressive difficulty and risk perception (and occasionally risk exposure), each element building on the one before it.
- The alignment of core values and responsible stewardship of the land, health and welfare of our shared patrons of White Rock Parks.

**Next Steps**

Should Council wish to proceed with the proposal, the next steps in the process would include:

- Public consultation
- Report back to Council on results of public consultation
- Report to Council for approval of lease
- Development approvals
- Installation
BUDGET IMPLICATIONS
It is anticipated that revenue will be generated from a potential lease with WildPlay and that there will also be in kind improvements to the forested area beneath the WildPlay attractions such as removal of invasive species, trail improvements etc.

RISK MANAGEMENT
WildPlay has a record of success in other locations in British Columbia which could place a large demand on existing parking facilities. This parking demand could be mitigated by:

- WildPlay negotiating exclusive parking arrangements with nearby churches.
- WildPlay constructing parking along the east side of High Street adjacent to Ruth Johnson Park subject to satisfactory consultation with nearby residents.
- WildPlay assisting with improvements to the configuration of existing parking at Centennial Park.
- Some type of decal or permit system for users of the Centre for Active Living and prohibition of other parkers or possibly a parking restriction to White Rock residents only.

CLIMATE CHANGE IMPLICATIONS
Invasive species could potentially be removed as part of the facility installation and lease revenues could be used for further removal as well as restoration of trails and pathways to minimize erosion into watercourses. Efforts could be made through WildPlay advertising to encourage carpooling and transit as many of the vehicles accessing the site will burn hydrocarbons (not all electric). Staff could work with WildPlay to ensure that facilities are available to refill drinking water containers.

CONCLUSION
This report and the accompanying presentation to Council by WildPlay is intended as an introduction to the concept of the City leasing a portion of Ruth Johnson Park to WildPlay for a wilderness playground facility. A lease arrangement with WildPlay for a wilderness playground facility could be a benefit for the City of White Rock, its residents and its businesses.

Jim Gordon,

Council endorsed the Committee’s recommendation directing staff to integrate important contacts and information for seniors in the spring and summer leisure guide.

**Senior Information Page on City Website**
Council endorsed the Committee’s recommendation to have staff update the City website to make it more easily accessible for seniors.

**Seniors Coordinator Role**
Councillor Johanson noted that Council defeated the Committee’s motion for a designated Senior’s Services Coordinator.

Staff noted that they are in the process of updating both the Leisure Guide and the City website following the recommendations endorsed by Council.

6. **OTHER BUSINESS**
The Committee discussed the possibility of inviting delegations to attend future Committee meetings to discuss relevant seniors’ issues.

The following discussion points were noted:

- The United Way recently had a two (2) day conference with a variety of seniors’ agencies in attendance. It was suggested that a representative from the United Way could be invited to a future Committee meeting to provide information on trends/discussions from the conference.
- Obtaining information from other municipalities with respect to community plans for seniors was discussed.
- Seniors housing was identified as another important issue. It was suggested that this could be addressed through the City’s Housing Advisory Committee.

**Action Item:** Committee members to research other municipalities’ seniors’ plans and to provide information back on this topic at the next scheduled meeting.

**Action Item:** Committee Clerk to include the topic ‘Future Delegations’ on the next scheduled meeting agenda.

Note: S. Johnson assumed the role of Chairperson.

5. UPDATE ON THE WATER TREATMENT PLANT
Staff provided the following update:
- Staff have been in contact with the consultant. Plans for improvement were discussed and adding chloride to the water was proposed, which will help precipitate out phosphorous.
- After the regeneration process begins, improvements in the water quality should been seen in two (2) to three (3) weeks.
- Research indicates that when chloride is introduced it reduces arsenic levels.
- The City will conduct the regeneration process by running through the filter for two (2) hours, which will change the pH levels.

In response to questions from the Panel, staff noted the following:
- The City is working towards reducing the ozone and monitoring Arsenic levels. As a result, the Phosphate concern will be reduced.
- The filters for the removal of Arsenic have shown signs of premature aging. After the regenerated process, the filter should be at 90%, which will produce better results.
- The regeneration process is conducted by taking one filter out of service at a time. Sodium Hydroxide is cycled through it for two (2) hours. The circulation helps remove the Phosphate and other contaminants like Arsenic. After which, the filter will be drained and flushed with water. The regeneration results are received after 24 hours and the filter is put back in service. The Water Treatment plant has four (4) filters, this process is estimated to take one (1) week to complete.
- The cycling of Sodium Hydroxide through the filters will change the pH.
- The regeneration process does not leak into the water system.
- The regeneration testing and results will be included in the City’s new patent request.

A Panel member noted concern for the discoloration of a household water filter. Staff responded that any residue seen on the filter is a result of what is in the pipes. It was also mentioned that older homes have had manganese run through the pipes long before the Water Treatment Plant was implemented. It may be useful to flush the pipes for a more accurate result.

A Panel member noted concern for residue build up on drinking glasses. Staff noted that the residue is due to the calcium (hardness) in the water. The water here is considered moderate hard at 100 mg/L.
The Panel discussed using a water softener and other types of filtration to reduce the residue. The compound of dishwasher agents were also debated.

Staff noted that there is no additional chlorine being added to the water.

In response to a question from the Panel, Staff noted that the arsenic levels are not increasing. They are currently at 4.0 micrograms per litre, with manganese sitting below the detection line.

The Panel reviewed the December 23, 2019 Water Treatment Plant results report, and noted the high iron content. Staff noted that they have more recent results than December 23, 2019 and they will look into relaying that information to the Panel.

**Action Item:** Staff to provide the Panel with the most recent Water Treatment Plant test results.

6. **UPDATE ON WCAP RECOMMENDATIONS TO COUNCIL**

Councillor Trevelyan provided an update on the outcome of the previous recommendation provided to Council from the Panel. The following was noted:

- Council endorsed all of the Panel’s recommendations.
- Communication has been relayed to the public regarding the status of the Water Treatment Plant.
- Council has agreed to hold off on the changes to the rate structure at least until the following year (2021).

In response to a question from the Panel, Councillor Trevelyan noted the following:

- Council was considerate of multi-family units and businesses rates increasing if the City moved towards a pay-by-use rate structure.
- It is important to consider large community partners (e.g. Peace Arch Hospital) when determining how a pay-by-use structure will be implemented.

The Panel discussed the process of composing a pay-by-use rate structure and the tools they would need to consider before making a recommendation to Council.
7. **2020 WORK PLAN**

The Panel discussed and prioritized their work plan for the 2020 term. Potential topics for discussion were noted:

- Proposed water rate increases in White Rock over the next four (4) years.
- Discussion on joining Metro Vancouver water.
- Review of comparable water rates in other cities and their proposed water rate increases over the next four (4) years.
- Consumption-based model – graduated plans, alternative fixed/consumption ratios, communication plan.
- Emergency fire system, emergency preparedness and the City’s emergency plan.
- Development Impact on our Water System – Development increase in White Rock causes pressure increases of manganese levels. It could also be labeled “Fines or Penalties for improper Water Use”.
- General public communication of water updates and initiatives.
- Water conservation initiatives.

The following additional comments were noted:

- The water rate will increase each year over the next four (4) years. This includes rates for the existing model. Staff noted that whether or not the rate model is adjusted, rates would still increase 6% per year.
- Staff noted that under the *Local Government Act* the City is required to come up with a five (5) year financial plan. This plan includes a yearly increase in operating costs; however, when council reviews the budget each year this can be adjusted.
- It was noted that White Rock is charging more than neighboring municipalities like Surrey who charges $1.50 per cubic meter.
- Staff noted that Community Amenity Contribution (CAC) money could not be used on the water system, neither can general taxation revenue.
- Development Cost Charges (DCC) can only be used for growth purposes, not maintenance.
- A report from 2013 is included in the agenda package that outlines the cost to join Metro Vancouver. Staff noted that the water in Metro Vancouver has disinfectant byproducts that increase towards the outskirts of the system. White Rock would be hooking up to the outskirts of the system. Metro Vancouver water also has a low pH, which causes the bleaching of lead.

The Panel discussed their mandate and what they would like to focus on. The idea of integrating water conservation efforts into their work plan was also mentioned.

2020-WCAP-04

**IT WAS MOVED AND SECONDED**

THAT the Water Community Advisory Panel adopt their 2020 work plan as follows:

1. Consumption-based model – graduated plans, alternative fixed/consumption ratios, communication plan.
2. Emergency fire system, emergency preparedness and the City’s emergency plan.
3. Review of comparable water rates in other cities and their proposed water rate increases over the next four (4) years.
4. Proposed water rate increases in White Rock over the next four (4) years.
5. Miss-Use of the Water System.

A Bylaw to amend the

The CITY COUNCIL of the Corporation of the City of White Rock, in open meeting assembled, ENACTS as follows:

1. That Section 4.1 “Uses Permitted/Not Permitted – General” of the “White Rock Zoning Bylaw, 2012, No. 2000” as amended, be amended as follows:
   (1) By deleting the existing section 4.1.5 in its entirety and replacing it with the following new section 4.1.5:

   4.1.5 a) The commercial cultivation, growth, production, storage, barter or sale of cannabis, or any products containing or derived from cannabis, is not permitted in any zone except as otherwise provided in this bylaw. This includes licensed producers regulated under applicable provincial or federal legislation, and cannabis stores.
   b) The retail sale of cannabis accessories, as defined by the federal Cannabis Act, is permitted within a cannabis store but is not permitted within 500 metres of a zone that permits a cannabis store or within 500 metres of a property where a cannabis store is authorized by a Temporary Use Permit.

2. That Section 7.16 of Schedule “B” – Comprehensive Development Zones’ of the “White Rock Zoning Bylaw, 2012, No. 2000” as amended, be amended as follows:

MEMORANDUM

TO: Randy Tingskou, A Little Bud
FROM: Aaron Chan, P.Eng., CTS
DATE: 27 June 2019
RE: 1484 Johnston Road Traffic Engineering Services
    White Rock, BC
FILE NO: 7082-061

Creative Transportation Solutions Ltd. (CTS) is pleased to submit this FINAL memo summarizing our findings on the access review at 1484 Johnston Road in the City of White Rock.

The primary objectives of this assignment were as follows:

1. To conduct a site visit to document the existing condition and operation of the access and parking lot at 1484 Johnston Road in the City of White Rock;
2. To review the existing condition and operation of the access and parking lot and determine the appropriate justification to improve the operation and safety of the access and parking lot; and
3. To prepare a brief report summarizing the technical analysis, key findings and Recommendations.

This document summarizes our technical analysis, key findings and recommendations.

1.0 EXISTING CONDITIONS
1.1 Site Visit

CTS conducted a site visit on Monday, June 17, 2019 to observe the existing condition of the access and parking lot at 1484 Johnston Road in the City of White Rock. From the site visit, we summarized the followings:

- The access is located between 1468 and 1478 Johnston Road with an access driveway of approximate 20 meters long and 4.3 meters wide;
- The distance from the curb edge to the building at the frontage of Johnston Road is approximate 3.5 meters, which includes 2 meters of the pedestrian sidewalk and 1.5 meters of the front porch;

innovative, functional, comprehensive.
• Motorist sight distances to the pedestrian on the sidewalk are limited by the buildings on both side of the access driveway when exiting the access;

• No operation issues were observed for motorist entering the access from Johnston Road;

• The 1484 Johnston Road back parking lot consists of 10 parking stalls and have sufficient space for a typical passenger car to make U-turns when all parking stalls are occupied;

• The 1484 Johnston Road back parking lot is connected to the parking lot of 15226 Russell Avenue with no fence or blockage in between;

• To access the 1484 Johnston Road back parking lot, motorist can use either the access on Johnston Road or the access on George Street (15226 Russel Avenue parking lot access);

• No vehicle was observed to use the parking lot as short-cut through the accesses from/to George Street to/from Johnston Road during the survey period.

• During the site visit between 15:00-16:00, a 30 minutes traffic count was conducted to the study access and parking lot. Only one vehicle was observed to leave the parking lot using the study access.

**FIGURE 1** illustrated the photos of study access, access driveway and parking lot behind the building of 1484 Johnston Road.
2.0 DISCUSSION AND RECOMMENDATION

2.1 Discussion

From the observation documented in the section above, we noticed that the usage of the study access and parking lot is not significant. No capacity issues were identified. Also, no vehicle was observed to use the parking lot as short-cut through the accesses from/to George Street to/from Johnston Road during the survey period. It is expected that some motorists may use either the access on George Street or Johnston Road to access both the 1478 Johnston Road parking lot and 15226 Russel Avenue parking lot.

It is concerned that the limited motorists’ visibility when exiting the access to Johnston Road as the buildings on both sides of the access driveway block the motorists view to the pedestrian on sidewalk at the frontage of 1478 Johnston Road. To mitigate the situation, a speed hump could be used to slow the traffic at the access driveway in addition to a warning and stop signs to warn the motorists to stop for pedestrian crossing ahead on the sidewalk. Also, to improve the motorists’ visibility to the pedestrian, a meter-high fences or delineators could be used to block the pedestrian crossing the access at the...
front porch area while letting the motorists to advance forward 1.5 meters for better visibility.

It is also concerned that the access driveway width is approximate 4.3 metres, which is not sufficient for two-way traffic at the same time. Based on the current access traffic volume, conflicts between opposite traffic at the access driveway is negligible. No action is required to mitigate the opposite traffic conflicts at the moment. Consideration for mitigation when the access traffic volume is over 30 vehicles per hour.

2.2 Recommendation

Based on the findings, CTS recommended that:

- Installing the speed hump, “Stop” sign, “Pedestrian Crossing” Warning sign to the access driveway;
- Installing 1-meter tall fences or delineators at the front porch on both sides of the access driveway.

RE: $10 a Day Child Care Plan

Dear Ministers,

Childcare in the Alberni-Clayoquot Regional District (ACRD) is a top concern for young families. This influences the recruitment and retention of young families in our community and our overall economic prosperity. While increasing the number of affordable childcare spaces is a need, we must also support the development of safe, nurturing environments and the early year’s profession, which employs numerous individuals in our region.

This was highlighted at the regular ACRD Board of Directors meeting of November 27, 2019 where the following resolution was adopted:

“THAT the Alberni-Clayoquot Regional District Board of Directors write the provincial government and request they expedite the $10aDay Child Care Plan implementation universally and play an active role in advocating for provincial level changes and cc all local governments.”

Results of the 2019 ACRD Child Care Needs Assessment (attached) validate the economic and social toll of the current childcare system. This necessitates significant investment and focused activities to both increase the number of quality childcare spaces available to families and to strengthen the childcare sector to champion these changes. The return on investment for communities is significant; not only will parents be able to return to work, but also the resilience of children will increase through quality early care and education, with the ultimate outcome being healthier, more productive citizens, and stronger social and economic sustainability.

Your consideration of our request is greatly appreciated.

Sincerely,

John Jack,

Permission to Canvass

From April 1 to April 30, 2020 the Canadian Cancer Society holds its annual Daffodil Campaign. During the month, the Door to Door fundraising drive takes place. The dollars raised assist the Canadian Cancer Society in providing funds for cancer research, services to people living with cancer, education, information and advocacy for healthy lifestyles. Hundreds of volunteers participate each year.

At this time I am requesting permission to canvass in the City of White Rock from April 1 to April 30, 2020.

I look forward to your positive response to the request.
